SUMMARY

Aspiring Game QA Tester with 10+ years of gaming experience across FPS, MOBA, RPG, Strategy and Simulation titles, including 18,000+ hours in competitive games. B.Sc in Computer Science & Engineering. Focused on gameplay analysis, bug reporting and clear test documentation, backed by a background in quality control, operations and international client communication. Learning game development with Unreal Engine and Blender to understand why bugs happen, not just how to reproduce them.

GAME TESTING SKILLS

Testing: Gameplay testing, functional testing, UI/UX evaluation, regression and smoke testing, edge cases, map testing, performance observation
Documentation: Bug reports with reproduction steps, expected vs actual results, severity and priority; test case writing
Tools: Jira (learning), Notion, OBS Studio, Postman, Git & GitHub
Test setup: Windows 11 Pro, AMD Ryzen 7 7700, NVIDIA RTX 5070 12GB, 32 GB DDR5
Technical background: Learning Unreal Engine and Blender; HTML, CSS, JavaScript, TypeScript, React, Next.js

QA PRACTICE WORK

- Practice bug reports (animation, collision, UI/tooltip data, audio) written in studio bug-tracker format on local test builds. See portfolio.

GAMING EXPERIENCE

10+ years across FPS, MOBA, RPG, Strategy, Simulation and Sports.

18,931 h	4,297 h	3,000+ h
Dota 2	Counter-Strike 2	PUBG: Battlegrounds
